

# THAN SORYAPONGS

IT INTERN

## About Me

I am a third-year IT Engineering student with a strong foundation in software development, networking, and system administration. Passionate about technology and problem-solving, I have hands-on experience in coding, database management, and from various academic projects and personal endeavors. I am eager to apply my skills and learn new ones through an internship that offers real-world experience in the tech industry. My goal is to contribute to impactful projects while continuing to develop my expertise in IT.

## EDUCATION

### Chompuvone High school

Graduated from high school  
2017 - 2022

### Royal University of Phnom Penh

Bachelor of IT Engineering  
Graduate expectation (2027)

## LANGUAGE

- English: Good (Writing, Listening, Speaking)
- Khmer: Mother tongue

## EXPERIENCE

### E-commerce System (Java Swing) - Academic Assignment

- Developed an e-commerce application using Java Swing as part of an academic assignment.
- Created a user-friendly interface for:
  - Product browsing
  - Shopping cart management
  - Admin page
- Implemented key features including:
  - User authentication
  - Product catalog management
  - Payment handling
- Strengthened skills in:
  - Java programming
  - GUI development
  - Project management within a structured academic environment

### Personal Website

- Designed and developed a personal website using:
  - React.js
  - Tailwind CSS
- Key features of the website include:
  - Clean, modern layout
  - Fully responsive design for desktop and mobile devices
- Gained valuable experience in:
  - Modern web development with React.js
  - Responsive design using Tailwind CSS

### Stock Management System (C++) - Academic Assignment

- Developed a stock management system using C++.
- Key features include:
  - Product categorization
  - Inventory updates
  - Report generation
- Allows for:
  - Efficient tracking and management of inventory levels
  - decision-making for data management
- Strengthened skills in:
  - C++ programming
  - Data structures
  - Algorithm design, particularly in inventory management

## SKILL SUMMARIES

- Data Structures and Algorithms
- Web Development (HTML, CSS, JavaScript, React.js, Tailwind CSS)
- Relational Database Management Systems
- Advanced Java
- Advanced C++
- Python: Experienced in Python for Data Structure and Algorithm
